- Laminated Hardwood Wood Components
- Designed and Built in the U.S.A.
- Highest Quality American Workmanship - A Crippen Standard
- Screens and Replacement Parts Always in Stock at Factory for Prompt Delivery

The Crippen Micro 180 is designed for precision cleaning of small lots or low volume, continuous conditioning of seed. Quickly and easily cleaned out, controlled and flexible, the Micro 180 is adaptable to a wide variety of products and varying conditions.

Standard equipment includes an independent electronic variable speed feed roll and screen shake drive, two aspiration systems including pre and final aspiration (before and after screening the good product), and a proven ball tray screening cleaning system.

Maximum adaptability is achieved with the Micro 180's flexible flow pattern. The top screen is always used as a scalp screen to remove large waste and the bottom screen is always used as a sift screen to remove small waste. The middle screen can serve to scalp, sift or size seed. All screens are 24" x 36" and interchangeable throughout the cleaner.

SPECIFICATIONS

Overall Machine Dimensions	75-1/2" long x 38-1/4" wide x 79-1/8" High
Each Overall Fan Dimension (2 required):	23" long x 23" wide x 28" high
Height to Hopper Inlet	65-5/8"
Average Cleaning Capacity on Grain	30-40 bushels/hour
Horsepower Requirements:	
Main Eccentric Drive	1-1/2 HP
Feed Roll Drive	1/2 HP DC
Fan Drives	2 Ea. 2 HP
Shipping Weight, Approximate lbs:	1,975
